

Farmfit ® is a ruminal bolus that's designed to read core temperature, rumination, and activity for cattle as early as calfhood and through their productive life. With this product, there is a website and app software provided to manage and record health instances, treatments, breedings, calvings, and more. With this management tool you have the capability to enter and view medications administered, vaccines, and treatment protocols which can be used to meet the requirements for FARM evaluation.

HEALTH

- Alerts
- Treatments**
- Treatments Follow-Up
- Withdrawal Milk/Meat
- Animal Dead/Sold
- Watch List
- Vaccine

**Step 2 and 3: Locate Health on the menu, and select Treatments**
